

Bryan Wong

+82 10-5157-0117 | bryan.wong@kaist.ac.kr | <https://bryanwong17.github.io>

INTERESTS

Computer Vision, Medical Image Analysis, Vision-Language Model

EDUCATION

Korea Advanced Institute of Science and Technology (KAIST)

Doctor of Philosophy in Graduate School of Data Science

Daejeon, South Korea

Aug. 2023 – Aug 2027

Korea Advanced Institute of Science and Technology (KAIST)

Master of Science in Graduate School of Data Science

Daejeon, South Korea

Aug. 2021 – Aug 2021

National Taiwan University of Science and Technology (NTUST)

Bachelor of Science in Computer Science and Information Engineering

Taipei, Taiwan

Sep. 2018 – June 2021

RESEARCH EXPERIENCE

Graduate Research Assistant

Korea Advanced Institute of Science and Technology (KAIST)

Sep 2021 – Present

Daejeon, South Korea

- Pioneered the integration of hierarchical heterogeneous graph structures with vision-language models (VLMs), enabling coarse-to-fine modeling of tissue architecture in gigapixel whole-slide images (WSIs).
- Developed a weakly-supervised multiple instance learning (MIL) framework for light microscope images, addressing redundancy and missing spatial coordinates via representative instance selection for graph-based learning.
- Systematically evaluated MIL feature extractors across pre-training dataset, backbone architecture, and pre-training method to address the lack of guidance in feature selection.
- Designed a patch recommendation module that filters noisy instances in real-world datasets, reducing pathologist annotation workload while improving diagnostic accuracy over existing methods.

Undergraduate Research Assistant

National Taiwan University of Science and Technology (NTUST)

Aug. 2018 – Aug 2021

Taipei, Taiwan

- Developed a movie genre classification model leveraging posters, subtitles, text statistics, facial expressions, and trailers to classify movies into nine genres, achieving 82% accuracy.

ACADEMIC SERVICES

- **Reviewer:** MICCAI 2025
- **Conference Volunteer:** MICCAI 2025

TECHNICAL SKILLS

- **Languages:** Python, R, Go, C++
- **Deep Learning Frameworks:** PyTorch, PyTorch Lightning
- **Developer Tools:** Git, VS Code, Visual Studio

WORK EXPERIENCE

Data Engineer Intern

Oct 2020 – Aug 2021

Commerce Connector by PriceSpider

Taipei, Taiwan

- Designed and implemented web crawling pipelines to collect pricing data for Buy Now Online (single store) and Buy Now In Stores (multi-store price comparison).
- Migrated ParseHub to an enterprise-scale crawling environment, optimizing efficiency and scalability.
- Integrated PriceSpider crawler by configuring API-based subscriptions, setting up an EC2 receiver, processing raw data through AWS Lambda, and storing structured feeds in Amazon S3.
- Led the Data Engineering team, conducting monthly strategy meetings to enhance data collection and processing workflows.

Back End Engineer Intern

July 2020 – Sep 2020

Aurora Tech

Taipei, Taiwan

- Designed and implemented RESTful APIs using IRIS (Go Web Framework) to facilitate seamless communication between services.
- Integrated multiple game providers, enabling functionalities such as user authentication, balance retrieval, deposit/withdrawal processing, and game result settlement (both settled and unsettled).
- Refactored and optimized game provider code, improving system efficiency, maintainability, and scalability.

HONOR & AWARDS

- **KAIST International Graduate Scholarship (2021–2027):** Fully-funded Master’s and Ph.D. scholarship covering tuition, living expenses, and national health insurance.
- **Minister, Overseas Community Affairs Council, Republic of China (Taiwan) (2020):** Awarded for outstanding academic performance and dedication.
- **ICATI Jakarta Scholarship Award (2021):** Awarded by the Indonesian Taiwan Alumni Association (ICATI) for outstanding performance in the 2020 academic year.

SUMMER SCHOOL

- **Oxford Machine Learning (OxML) 2024:** Selected participant in the OxML 2024 program, focusing on MLx Health & Bio, MLx Representation Learning, and Generative AI tracks.

ONLINE COURSES

- **AI for Medical Diagnosis**, DeepLearning.AI: Covers AI applications in medical practice, including diagnosis, health prediction, and treatment recommendation.
- **Machine Learning**, Stanford University: Provides a broad introduction to modern machine learning, including supervised and unsupervised techniques.

SOCIAL SERVICE

- **Member of Project Let's Go (2020):** Taught English and STEAM subjects at Chishang Junior High School through hands-on experiments and coding sessions.
