

# Bryan Wong

 [bryan.wong@kaist.ac.kr](mailto:bryan.wong@kaist.ac.kr) |  [bryanwong17.github.io](https://github.com/bryanwong17) |  [linkedin.com/in/bryanwongg](https://linkedin.com/in/bryanwongg)

## RESEARCH INTERESTS

Computer Vision, Medical Image Analysis, Vision-Language Model, Multimodal LLM, Agentic AI

## EDUCATION

### Korea Advanced Institute of Science and Technology (KAIST)

Ph.D., Data Science (GPA: 4.02 / 4.3) [[Transcript](#)]

Daejeon, South Korea

Aug. 2023 – Aug 2027 (expected)

### Korea Advanced Institute of Science and Technology (KAIST)

M.S., Data Science (GPA: 3.98 / 4.3) [[Transcript](#)] [[Diploma](#)]

Daejeon, South Korea

Aug. 2021 – Aug. 2021

### National Taiwan University of Science and Technology (NTUST)

B.S., Computer Science (GPA: 3.87 / 4.3) [[Transcript](#)] [[Diploma](#)]

Taipei, Taiwan

Sep. 2018 – June 2021

## PUBLICATIONS

### International Conference Publications

**C08 Few-Shot Learning from Gigapixel Images via Hierarchical Vision-Language Alignment and Modeling** [[PDF](#)] [[Code](#)] [[OpenReview](#), [Poster](#), [Slide & Video](#)]

**Bryan Wong\***, Jongwoo Kim\*, Huazhu Fu, and Mun Yong Yi

*The Thirty-Ninth Annual Conference on Neural Information Processing Systems (NeurIPS)*, 2025.

**TL;DR:** We propose HiVE-MIL, a hierarchical vision-language framework for gigapixel pathology images (WSIs) that models cross- and intra-scale visual-text relationships for superior and interpretable few-shot classification.

**C07 Not All Options Are Created Equal: Textual Option Weighting for Token-Efficient LLM-Based Knowledge Tracing** [[PDF](#)] [[Code](#)] [[Poster](#)]

Jongwoo Kim\*, SeongYeub Chu\*, **Bryan Wong**, and Mun Yong Yi

*Conference on Empirical Methods in Natural Language Processing (EMNLP Findings)*, 2025.

**TL;DR:** We present LOKT, an LLM-based knowledge tracing framework that converts learner option selections into textual weights, enabling token-efficient and interpretable prediction of student performance.

**C06 Leveraging Multi-Facet Paths for Heterogeneous Graph Representation Learning** [[PDF](#)] [[Code](#)]

Jongwoo Kim, SeongYeub Chu, Hyeongmin Park, **Bryan Wong**, Keejun Han, and Mun Yong Yi

*34<sup>th</sup> ACM International Conference on Information and Knowledge Management (CIKM)*, 2025.

**TL;DR:** We introduce MF2Vec, a heterogeneous-graph representation framework that leverages dynamic, fine-grained multi-facet paths instead of rigid meta-paths to learn robust node embeddings.

**C05 MicroMIL: Graph-based Contextual Multiple Instance Learning for Patient Diagnosis Using Microscopy Images** [[PDF](#)] [[Code](#)] [[Poster](#)]

Jongwoo Kim\*, **Bryan Wong\***, Huazhu Fu, Willmer Rafell Quiñones Robles, Young Sin Ko, and Mun Yong Yi

*28<sup>th</sup> International Conference on Medical Image Computing and Computer Assisted Intervention (MICCAI)*, 2025.

**TL;DR:** We propose MicroMIL, a graph-based multiple instance learning framework that dynamically reduces redundancy and models contextual relationships in microscopy images for robust weakly supervised diagnosis.

**C04 Rationale Behind Essay Scores: Enhancing S-LLM's Multi-Trait Essay Scoring with Rationale Generated by LLMs** [[PDF](#)] [[Code](#)] [[Poster](#)]

SeongYeub Chu\*, Jongwoo Kim\*, **Bryan Wong**, and Mun Yong Yi

*Annual Conference of the North American Chapter of the Association for Computational Linguistics (NAACL Findings)*, 2025.

**TL;DR:** We introduce RMTS, a multi-trait essay scoring framework that integrates LLM-generated trait-specific rationales with a fine-tuned S-LLM to improve scoring accuracy and interpretability.

### C03 Rethinking Pre-Trained Feature Extractor Selection in Multiple Instance Learning for Whole Slide Image Classification [PDF] [Code] [Poster]

Bryan Wong, Sungrae Hong, and Mun Yong Yi

*IEEE International Symposium on Biomedical Imaging (ISBI)*, 2025.

**TL;DR:** We evaluate how the choice of pre-trained feature extractor, considering dataset size and diversity, backbone architecture, and pre-training method, affects MIL performance on gigapixel pathology images (WSIs).

### C02 Towards Classifying Histopathological Microscope Images as Time Series Data [PDF] [Poster]

Sungrae Hong, Hyeong Min Park, Youngsin Ko, Sol Lee, Bryan Wong, and Mun Yong Yi

*IEEE International Symposium on Biomedical Imaging (ISBI)*, 2025.

**TL;DR:** We recast microscope images from pathology as time-series sequences, using dynamic time-warping and attention-based pooling to stabilize classification despite varying acquisition lengths.

### C01 Analyzing Gender Pay Gap in STEM Fields by Life Trajectory [PDF] [Poster]

Wenchao Dong, Bryan Wong, Hasnain Irshad Bhatti, Lanu Kim, and Meeyoung Cha

*8<sup>th</sup> International Conference on Computational Social Science (IC2S2) and Korea Computer Congress (KCC)*, 2022.

**TL;DR:** We analyze gender pay disparities in STEM through life trajectory modeling, highlighting career dynamics contributing to the pay gap.

## International Journal Publications

### J01 A Predicted-Loss Based Active Learning Approach for Robust Cancer Pathology Image Analysis in the Workplace [PDF]

Mujin Kim, Willmer Rafell Quiñones Robles, Youngsin Ko, Bryan Wong, Sol Lee, and Mun Yong Yi

**BMC Medical Imaging**, 2024.

**TL;DR:** We introduce a predicted-loss based active learning method that dynamically filters out noisy patches and selects informative ones, enabling robust high-accuracy pathology image classification.

## Preprints

### P02 Leveraging Spatial Context for Positive Pair Sampling in Histopathology Image Representation Learning [PDF]

Willmer Rafell Quiñones Robles, Sakonporn Noree, Youngsin Ko, Bryan Wong, Jongwoo Kim, and Mun Yong Yi  
*Preprint*, 2025.

**TL;DR:** We propose a spatial context–driven sampling strategy for self-supervised learning (SSL) in pathology that leverages coherence among spatially adjacent patches in gigapixel pathology images (WSIs).

### P01 PreMix: Label-Efficient Multiple Instance Learning via Non-Contrastive Pre-Training and Feature Mixing [PDF] [Code]

Bryan Wong and Mun Yong Yi

*Preprint*, 2024.

**TL;DR:** We propose PreMix, a label-efficient multiple instance learning framework that uses non-contrastive pre-training and feature mixing to improve WSI classification with limited labels.

## ACADEMIC SERVICES

---

- **Reviewer:** MICCAI 2025

- **Student Volunteer:** MICCAI 2025 [Photo]

## SUMMER SCHOOL

---

- **Oxford Machine Learning (OxML 2024)** [Certificate] : Selected participant in the OxML 2024 program, focusing on MLx Health & Bio, MLx Representation Learning, and Generative AI tracks.

## WORK EXPERIENCE

---

<b>Data Engineer Intern</b> [ <a href="#">Certificate</a> ] <i>Commerce Connector by PriceSpider</i>	Oct 2020 – Aug 2021 Taipei, Taiwan
<ul style="list-style-type: none"><li>Designed and implemented web crawling pipelines to collect pricing data for Buy Now Online (single store) and Buy Now In Stores (multi-store price comparison).</li><li>Migrated ParseHub to an enterprise-scale crawling environment, optimizing efficiency and scalability.</li><li>Integrated PriceSpider crawler by configuring API-based subscriptions, setting up an EC2 receiver, processing raw data through AWS Lambda, and storing structured feeds in Amazon S3.</li><li>Led the Data Engineering team, conducting monthly strategy meetings to enhance data collection and processing workflows.</li></ul>	July 2020 – Sep 2020 Taipei, Taiwan

## SCHOLARSHIPS & AWARDS

---

- KAIST International Graduate Scholarship (2021–2027)** [[Certificate](#)]: Fully-funded Master's and Ph.D. scholarship covering tuition, living expenses, and national health insurance.
- ICATI Jakarta Scholarship Award (2021)** [[Certificate](#)]: Awarded by the Indonesian Taiwan Alumni Association (ICATI) for outstanding performance in the 2020 academic year.
- Minister's Award for Overseas Community Affairs (2020)** [[Certificate](#)]: Awarded by the Overseas Community Affairs Council, Republic of China (Taiwan), for outstanding academic performance and dedication.

## SOCIAL SERVICE

---

- Member of Project Let's Go (2020)** [[Photos](#)]: Taught English and STEAM subjects at Chishang Junior High School through hands-on experiments and coding sessions.
